

ALL THE SPARES YOU'LL NEED ON A RIDE25 TOUR!

EXPLORE THE WORLD LEG BY LEG

SPARE GEAR HANGER £10 - £25

Unique to every bike this little piece of metal can really save the day if your gears take a bad knock. Definitely a wise investment. **Please note:** This item may need to be ordered in.

SPOKES 60p - £5 EACH

Spokes come in all sorts of shapes and sizes. Most bikes will need 3 different lengths. Usually one for the front wheel and two for the rear. It's a good idea to grab a couple of each length just incase.

CHAIN POWERLINK - £3

This clever little joining link allows you to re-join your chain in the event of it snapping. Simply count the number of cogs attached to your rear wheel and ask for the appropriate connecting link i.e. 9 speed link, 10 speed link, 11 speed link

COMPACT PUMP OR GAS CANISTER - AROUND £25

When it comes to inflating your tyre after a puncture, standard pumps can be hard work. A good quality Gas (Co2) Canister does the job in a fraction of the time. Ask your local bike shop for recommendations.

SPARE INNER TUBE - AROUND £6

Rather than waiting for glue and patches to dry, swapping a punctured inner tube for a new one will get you riding in no time.

PUNCTURE REPAIR KIT - £4

Hopefully you won't need it but worth having all the same!

TYRE BOOT - £4

Slightly different to the patches used to repair an inner tube. These self adhesive patches stick to the inside of your tyre, repairing any slices or rips.
